LexisDiagram-package

LexisDiagram-package {LexisDiagram}

[R Documentation](#)

Lexis diagram drawing made easy!

Description

A funcon for drawing Lexis diagrams (just specify ages and years), plus a triangle highlightin function.

Details

Package: EZLex

Type: Package

Version: 1.0

Date: 2010-12-17

License: General Public

LazyLoad: yes

Contains two functions: [Lexis\(\)](#) and [Thighlight\(\)](#), both very straightforward. Try the short examples and you'll get it. Please don't be bashful about suggestions and feedback.

Examples

```
ages <- 0:8
years <- 2000:2003
Lexis(ages=ages,years=years,labs=T)
Thighlight(2,col="#FF000050") # click on the graph to
```
