PRECONSENT: Info

NORC at the University of Chicago and the National Science Foundation have done the General Social Survey for more than 40 years to keep a historical record of the concerns, experiences, attitudes and practices of Americans. Your household was randomly selected from addresses across the nation for participation. The information collected is used by policy makers, scientific researchers, government officials and students to better understand Americans and better meet their changing needs.

The questions we'll ask have to do with your opinions and knowledge on a variety of important topics like work, the family, government, science, and health. Some topics may be sensitive for you, and you can decline to answer any question. At the end of the survey, I will complete a brief section of observations, including my impressions of how the interview went and where it took place, how long the interview took, and who else was present.

Your participation does not involve any risks other than what you would encounter in daily life. Most participants find the survey to be interesting with a chance to talk about things that matter to them. Which questions are asked depends partly on chance, and partly on your answers to other questions. The interview takes from about 60 to 90 minutes for most people. You may also be contacted in 2018 to participate in a future round of the General Social Survey.

(IF NEEDED: We can break up the interview into different sections if that will make it easier for you.)

PRESS ENTER TO CONTINUE

CONSENT: Categorical (Single)

Your participation is voluntary. However, all information that you provide will be kept in strict confidence. It is important to us to protect your privacy. All participants' answers are combined, and presented in the form of summary statistics, such as tables and graphs. If you decline to answer a question or a portion of the interview, data from other questions you have answered may be used in these summary statistics.

We have received a Certificate of Confidentiality from the National Institutes of Health. This means that your answers will be kept confidential, even if the researchers receive a court order or subpoena to release information that could identify you. The protection offered by the certificate does not stop the researchers from voluntarily reporting information about suspected or known sexual, physical, or other abuse of a child or elderly person, or a participant's threats of violence to self or others. If you voluntarily give your written consent for anyone to receive information about your participation in this research, then we may not use the certificate to withhold this information.

If you have questions about your rights as a research participant, you may call the NORC Institutional Review Board Manager toll-free at 1-866-309-0542. If you have questions about the General Social Survey, you can contact the project hotline at 1-888-837-8988.

Parts of this interview may be recorded for quality control purposes. This will not compromise the strict confidentiality of your responses. You can stop the recording at any time. May I continue with the recording?

FI INFO: IF R DOES NOT CONSENT, PLEASE BREAK OUT OF THE INTERVIEW BY PRESSING CTRL+END
