PRECONSENT: Info

NORC at the University of Chicago and the National Science Foundation have done the General Social Survey (GSS) for 50 years to keep a historical record of the concerns, experiences, attitudes and practices of Americans. This is a follow-up survey to the 2022 GSS. You were selected from participants in the 2022 GSS for participation in this short follow-up survey. The information collected is used by policy makers, scientific researchers, government officials and students to better understand Americans and better meet their changing needs.

The questions we'll ask have to do with culture and life in the U.S. You can decline to answer any question.

Your participation does not involve any risks other than what you would encounter in daily life. Most participants find the survey to be interesting with a chance to think about things that matter to them. The survey will take about 10 minutes to complete. You may also be contacted in the future to participate in a future round of the General Social Survey or another study established by the National Science Foundation. Participation in this round of the survey does not obligate you to participate in any future rounds of the General Social Survey or any other surveys. Any future participation on your part will again require us to gain your consent.

CONSENT.Response = {yes}

CONSENT: Categorical (Single)

Your participation is voluntary. Your responses to this survey are considered a continuation of participation to the GSS survey you had completed earlier so the answers can be analyzed together, and all information that you provide will be kept in strict confidence. It is important to us to protect your privacy. All participants' answers are combined, and presented in the form of summary statistics, such as tables

and graphs. If you decline to answer a question or a portion of the interview, data from other questions you have answered may be used in these summary statistics.

We have received a Certificate of Confidentiality from the National Institutes of Health. This means that your answers will be kept confidential, even if the researchers receive a court order or subpoena to release information that could identify you. The protection offered by the certificate does not stop the researchers from voluntarily reporting information about suspected or known sexual, physical, or other abuse of a child or elderly person, or a participant's threats of violence to self or others. If you voluntarily give your written consent for anyone to receive information about your participation in this research, then we may not use the certificate to withhold this information.

If you have questions about your rights as a research participant, you may call the NORC Institutional Review Board Manager toll-free at 1-866-309-0542. If you have questions about the General Social Survey, you can contact the project hotline at 1-888-837-8988.

Please press 'Next' to continue with the survey.
